EDUCATION

Bachelor of Engineering in Computer Science Specialization in IoT, Cyber Security including Block Chain Technology. Dayananda Sagar College of Engineering	2024-2028 Ongoing
Pre University Course Allen Institute - PCMC	2022-2024 95%
Secondary School BEML Composite PU college State board	March 2022 100%

TECHNICAL SKILLS

Languages: Java, JavaScript, C, C++

Frontend: HTML5, CSS3, Bootstrap

Database: MySQL

Cloud & Dev Tools: Git, GitHub

PROJECTS

IoT-Based Smart Irrigation System

Technologies: Node MCU(ESP8266), Soil Moisture Sensor, Relay Module, Blynk IoT Platform, Arduino IDE

- Developed a cost-effective smart irrigation system using NodeMCU, soil moisture sensor, and Blynk app.
- Automated irrigation using real-time sensor data and relay-controlled pump to reduce manual intervention and water usage.
- Enabled remote access and monitoring through the Blynk IoT platform for convenience and real-time control.
- Focused on sustainability and resource optimization, suitable for smart agriculture and urban gardening.

Delicacy – Healthy Food E-Commerce Website

Tech Stack: HTML, CSS, JavaScript, Bootstrap

- Developed a responsive frontend for an online shopping platform focused on fresh fruits, vegetables, and healthy meals.
- Designed a clean, intuitive UI featuring category sections, product cards, and homepage sliders.
- Integrated a customer reviews carousel to build trust and enhance user engagement.
- Ensured seamless performance across devices using Bootstrap grid and custom media queries.
- Demonstrated practical frontend development skills in e-commerce and health-focused UI design.
