

EDUCATION

Bachelor of Engineering, Dayananda Sagar College of Engineering , CGPA: 9.4	2024 - 2028
Higher Secondary, Allen Institute, 95%	2024
Secondary - State Board, BEML High School, 100%	March 2022

SKILLS

Frontend Development	HTML5, CSS3, Javascript, React JS, Bootstrap, Streamlit
Backend Development	Java, Python, JavaScript, C, C++
Databases & Cloud	MySQL
AI / Machine Learning	TensorFlow, Keras, Deep Learning, Convolutional Neural Networks (CNN), Transfer Learning
Computer Vision	OpenCV, NumPy, Matplotlib
Cloud & Dev Tools	Git, GitHub, Render
IoT Platforms & Hardware	NodeMCU (ESP8266), Blynk IoT Platform, Arduino IDE

PROJECTS

AI-Based Brain Tumor Detection System	
Technologies: Python, TensorFlow, Keras, MobileNetV2, OpenCV, Streamlit, Matplotlib, Render	GitHub Live Demo
- Developed a deep learning-based web application for brain tumor detection from MRI images. - Implemented transfer learning using MobileNetV2 for efficient medical image classification. - Applied image preprocessing and augmentation techniques using OpenCV. - Built an interactive user interface using Streamlit for real-time image upload and prediction. - Visualized model performance and prediction results using Matplotlib. - Deployed the application on Render for online accessibility.	
IoT-Based Smart Irrigation System	
Technologies: NodeMCU (ESP8266), Soil Moisture Sensor, Relay Module, Blynk IoT Platform, Arduino IDE	
- Developed a cost-effective smart irrigation system using NodeMCU, soil moisture sensor, and Blynk app. - Automated irrigation using real-time sensor data and relay-controlled pump to reduce manual intervention and water usage. - Enabled remote access and monitoring through the Blynk IoT platform for convenience and real-time control. - Focused on sustainability and resource optimization, suitable for smart agriculture and urban gardening.	
Delicacy – Healthy Food E-Commerce Website	
Technologies: HTML, CSS, JavaScript, Bootstrap	
- Developed a responsive frontend for an online shopping platform focused on fresh fruits, vegetables, and healthy meals. - Designed a clean, intuitive UI featuring category sections, product cards, and homepage sliders. - Integrated a customer reviews carousel to build trust and enhance user engagement. - Ensured seamless performance across devices using Bootstrap grid and custom media queries. - Demonstrated practical frontend development skills in e-commerce and health-focused UI design.	

CERTIFICATES

HackOasis V2 – Business Operations Website	Nov 2024
ByteXnce	
SQL Basics	Jul 2025
HackerRank	
MongoDB Course Completion	
Simplilearn	
E-Summit 2024 Volunteer Certificate	
Dayananda Sagar College of Engineering	

ADDITIONAL INFORMATION

Languages: English, Kannada, Telugu, Hindi, Tamil
Relevant Coursework: Object-Oriented Programming, Data Structures, Database Management Systems, Web Development, Artificial Intelligence Machine Learning, Internet of Things (IoT), Cyber Security Fundamentals
Extracurricular Activities: IEDC Club Volunteer, E-Summit 2024 Volunteer
Interests: Portrait Art, Sketching, Painting, Traveling, Swimming
